Sample Internship Postings

Position Title: UX Designer Intern

Function: Design & Development

Position Overview:

In your role as UX Designer Intern, you will be responsible for designing experiences with both UX design and UI design. You will partner with other designers, developers, and product management to create great experiences.

Duties and Responsibilities:

- Create design solutions that solve real problems for our players.
- Create process flows to conceptualize and communicate detailed interaction behaviors for multiple environments and audiences.
- Align business requirements, design methodologies, and technology factors to create on-brand designs for future state exploration, validation, and testing.

Skills:

- You are excited about product design, technology and the future of online ecosystems.
- You are a problem-solver and have the ability to implement ideas.
- You are a solid strategic and analytical thinker with excellent verbal and written communication skills.

Qualifications:

- Currently enrolled in an undergraduate program.
- Familiarity with the Adobe Creative Suite.
- Coding isn’t required, but an understanding of how it works is beneficial.
Sample Internship Postings

**Position Title:** GIS Intern

**Function:** Data Analysis

**Position Overview:**

We are a major retailer in Canada, serving the needs of Canadians in 10 provinces. Our core retail formats are designed to ensure we have the right offering in the right-sized stores for each individual market we serve — from our full-service format to the convenience format, each tailored to satisfy the unique shopping needs of our customers.

**Duties and Responsibilities:**

- Assisting in the creation of proposed residential growth across Canadian communities. This involves discussions with city planners and mapping of results using ESRI ARCGIS software.
- Running database analysis queries based on requests from various stakeholders.
- Working with GIS team to run database checks to ensure our systems and data is up to date.
- Work with analysts to help create sales forecasts for future growth opportunities.
- Maintain our competitive tracking database.

**Skills and Qualifications:**

- Senior level undergraduate student in a Geography or GIS program.
- Proficiency in ArcGIS software.
- Familiarity with utilizing database and running queries.
- Strong verbal and written communication skills.
