

## Western Retiree Chapter Newsletter

Our special event in February was a tour of the new **Ronald D. Schmeichel Building for Entrepreneurship and Innovation**. Many thanks to our hosts from the Morrisette Institute and Facilities Management. The institute offers a range of programs, workshops and mentoring to students from any discipline with an interest in entrepreneurship. The building is equipped with collaborative workspaces, digital lab, tool library, metal working machinery and 3D printer, all of which support entrepreneurs and innovators. The building itself is bright and technologically advanced and is the only building in London using a geo-thermal system for heating and cooling. Members found this to be an interesting and informative tour.

As we head into March and closer to Spring, we hope that you can join us for our events!
